

Introduction to nonlinear finite element modeling

Péter Z. Berke

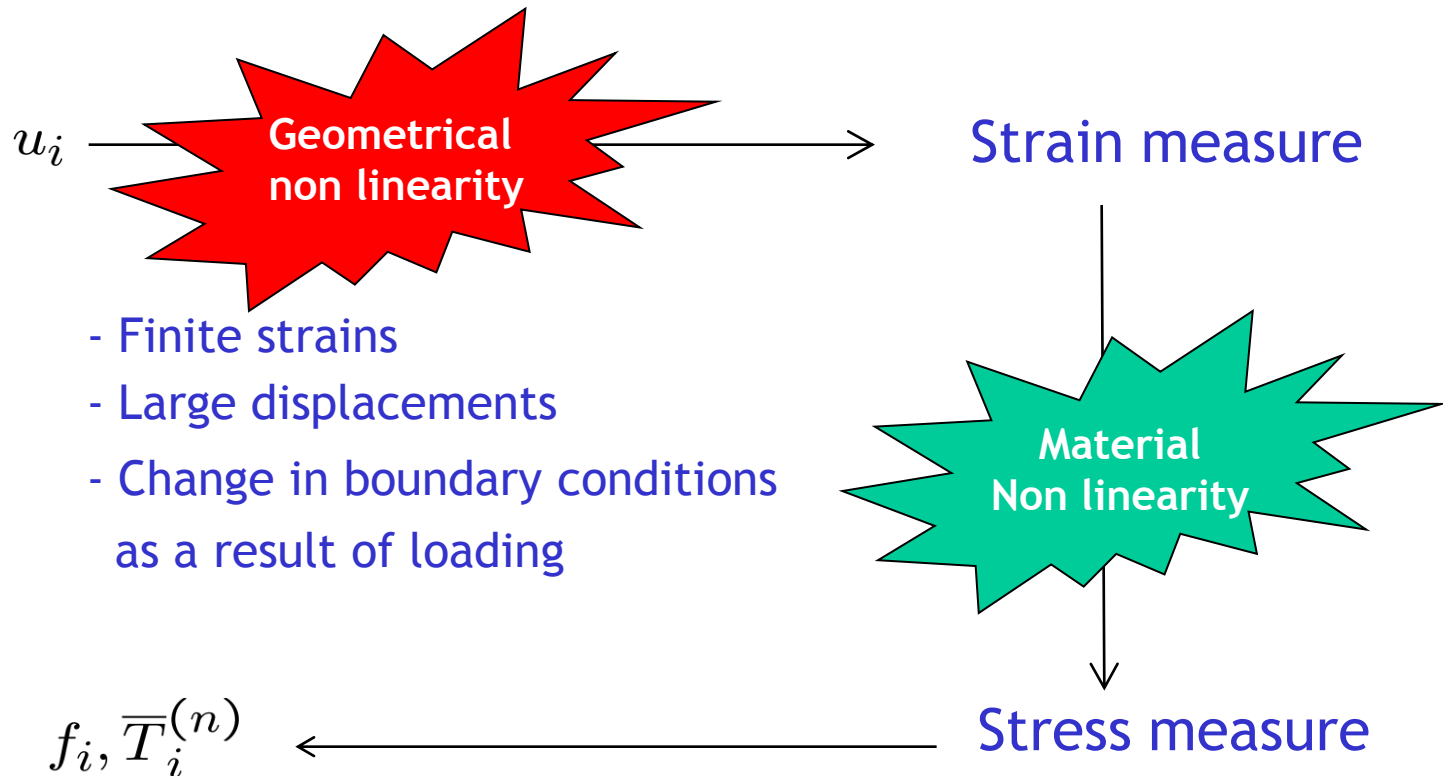

2.0. Sources of nonlinearity

Inspired and adapted from the 'Nonlinear Modeling of Structures' course of Prof. Thierry J. Massart at the ULB

Definition

Cause of a non proportionnality between applied forces and Resulting displacements

Sources

Load-induced changes in geometry

Large displacements

[www.futura-sciences.com]

[unknown source]

Finite strains

[MAPR]
